

## 262 ABACO SERIES

Scout Boats has just completed its newest addition, the all-new 262 Abaco Series for the 2006 model year. The 262 Abaco Series incorporates Scout's revolutionary NU-V3 hull design which offers the crew immense fuel efficiency without sacrificing performance. With 35 square feet of fishing area, a fully cushioned V-Berth and quarter V-berth in the cabin, the 262 Abaco Series is perfect for fishing, cruising or just relaxing on the water.

Ample storage space for rods, tackle and toys, and the added convenience of an incorporated marine head for extended trips makes this the ideal boat for your entire crew. The 262 also comes with a large 130-gallon fuel tank and an optional full enclosure package for added protection from the elements.

The 262 also features a full complement of important systems including fresh water wash down with six-gallon tank, cockpit raw water wash down, comprehensive gauge package including compass, integrated navigation lights and hydraulic steering.

Factory options include a selection of three hull gelcoat colors: Fighting Lady Yellow; Sea Foam Green and Flag Blue, all available with Flexi-Teek. Other options include a fiberglass hardtop complete with four rocket launchers and spreader lights, a Sirius satellite radio upgrade and full canvas enclosure.

## An American Revolution in Hard Bait Design!

Worden's®  
SeaTiger™

NOW AVAILABLE  
IN 3 SIZES!  
From 7 1/8"  
to 11"

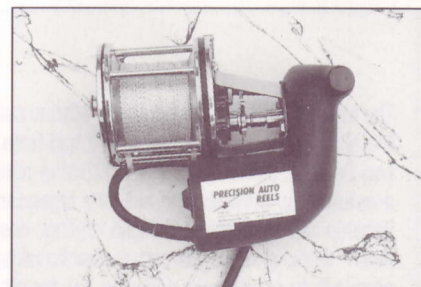

Worden's new Sea Tiger is the most advanced design hard body lure ever offered. Now available in three sizes, the deep diving Sea Tiger is perfect for all kinds of saltwater fish including redfish, strippers, tuna and many others. Big freshwater fish like musky, pike, lake trout, salmon and big bass will take the big lure too. The Sea Tiger imitates a wide variety of forage species and features full body details such as mouth, nostrils, fins, tail, lateral line and vent. Each Sea Tiger features a tough, integral molded lip and body (no add-on, rivet, or glue-on lips here), geodetic airplane style inner body wall bracing and strong molded-in wire forms. Add low speed action that outwiggles all the ancient stick minnow lures with true-tracking, deep-diving action up to 10 m.p.h. and you have a truly modern design that does not require add-on plastic tails or a jointed body to achieve a remarkable, life-like motion and visual appearance.
